Gli aspiratori/Compressori della serie MEC vengono da decenni utilizzati per lo svuotamento di pozzi neri ed il trasporto di liquami che possono servire anche per la ferti-irrigazione.

Sono caratterizzati da alta affidabilità grazie agli accorgimenti progettuali e di produzione applicati.

Die Ansauger/Kompressoren von Serie MEC sind seit Jahrzehnten benutzen für die Entleerung von Senkgruben und den Transport von Flüssigkeiten welche auch zur Dünge-Bewässerung verwendet können sein.

Sie haben eine hohe Zuverlässigkeit wegen den angewendeten Planungs und Herstellungs Besonnenheiten.

The exhausters/compressors of MEC series are used since many years to empty cesspools and to transport sewages which can be used also in fertilizing irrigation operations. They have an excellent reliability thanks to the planning and production actions applied.

Los aspiradores/compresores de la serie MEC proceden de la utilización decenal en el vaciado de pozos negros y en el transporte del purín que puede ser útil también en la fertilización y en la irrigación.

Están caracterizados por la alta fiabilidad gracias a los cuidados en el diseño y en la fabricación.

Les aspirateurs/compressors de la série MEC ont été utilisés depuis dix ans pour le vidage des vidanges et le transport des purins qui peuvent être utilisés même pour l'irrigation fertilisante.

Ils ont une haute fiabilité grâce aux précautions de construction appliqués.

Os aspiradores/compressores da série MEC procedem da utilização decenal no campo do esvaziamento de fossas e no transporte de estrume molhado que também pode servir para a fertilização ea irrigação.

Caracterizam-se pela alta confiabilidade graças aos cuidados aplicados no projecto e na fabricação.
